reduce their wayes to the same level.

A Democratic Scheme Foiled.

A Domocratic Schome Foiled.
We hope the Democrats of the House are not roing to commit so gress and alty an act of injustice as to unsert Mr. White, of Indian. They cannot afford to do it Mr. White is a citizen by a double claimary residence and inturalization, and by service—hosopable service, and wounds received in the war for the Union. He was a created by two thousand live bundred majority. To unseat him in the face of that majority and of his record in the war on a harren technically would be disgrace. Ind.—New York Beraid.

Yed this, is exactly what the majority of

Chairman Crlsp tried to do. That they

falled is due to the solld Republican vote

aided by a few Democratic members who refuted to be whipped into lice, realizing

that the temporary advantage to be galued by subseating Mr. White would more than be offset by the reaction against the party

when the people had an opportunity to re-

sent the outrage at the polis. The silly twaddle of the Boston Post about the Re-

publicans, being ready to vote for the un-

naturalized Englishman and against the

honestly naturalized Irishman is answered

by Gep. P. A. Collins, of Massachusetts, a MARSTON & CORHAM.

~GEORGE M. PULLMAN THE STORY OF THE MODERN ACE CAR RETOLD. J..... rinients Made on the

Mond-Reginater of the Palace Car. hien Laugh-Cutting Platforms.

car I in obtained the privilege of using a shock of the Alton railroad in the yard of the care in owards. The great question with this would be comfortable. They are no that then would be comfortable. They are not a dight area. Mr Pullman determined that the new chr should be the handsontable ever made. Hareteform a shoeping car had cost not more than \$1.000 of \$1.500 Looking the matter over and viousleining how he could arrange two berths that they are the the new christoned that the new christoned that the properties at the new christoned that the properties are to the disjoint of the matter over and viousleining how he could arrange two berths that would be romay [comfortable add cervoin int, he was perfected as to the disjoint of the matteress. At that the early shopping cars were simply used for adjudy cars in the carly shopping cars were simply used for adjudy cars in the run in the daytime.

Mr Pullman's like was to have a car that could be run on their true in the daytime. In fact, the same to the day the this object in view he started to build the "Pittoner" He found the mattresses could not be just on the foor because of the dart and discentifier. There was no place between the windows, and he lings am upper berty hear the root and just the mattresses in it when the berth is elected dering the dayther? The car builder replied at ones that the car was not that the space would be too small. This was before here were reas wore built with rails disclosely or roots. Then, asid Mr Pittiman why would be necessary to get in two befines conversation with a direction that plans should be dayned for a car rail with a laid two and one-helf for any root foot wide and two dard as high as would be necessary to get in two befines for any root foot wide and two dard as high as would be necessary to get in two befines for any root foot wide and two dards as high as would be necessary to get in two befines for any root foot wide and two and one-helf for light of the car that any car that had been to would be the pull an

DISCONTENT. To who long for work of nobler mold, the learnth we come a things may ald, who can dige find a mende or gold that needs use fifte a mixed or gold that needs use fifte any from spate. — From the Cerman by F. E. Shippa

srown streams, and the silver and gold deposits of Cerro de Prace- and Protect. What lies within is the subject of speculation. The takes of explorers, who have attempted to penetrate its mysterion read like the old remances of Golconda and the RI Dorada of the Amazens, where the wealant warriers wire armore of folio gold; but the swampe and the mountains, and the rivers that cannot be forded, and the jurgles which forly is search; the absone of food, and the difficulty of entrying sufficient supplies on foot, with the other obstacles that have prevented exploration, will be byercome eventually, and the secret that has tantalized the world for four centuries will be told by ambitious scientifia.—Europe's Menthly.

The Ameer of Afghantatan.

The People commonly think of the Ameer of Afghantatan as a mercea, errol, covidous, despote savage, but nothing, according to Messrs Offerar and Pyran the only two Englishmen who have seen him at home, could be

Arghanistan es a merceo, crecl, covedous, despote savago, but nothing, according to Messrs O'Messa and Pyno, though the buyl two Einglishmen who have seen life at home, could be more utility the first had been as a considerable of the order of the first country being lishmen who have seen life at her government is no death sorche; for only a rod of from could keep the 'Afghans under centrel. Nevertholesa, uthough the Ameer is undertholly respected, and perhaps admired, by the muss of his people, the weight of his hand is folt chiefly by the Strains. He is essentially a friend of the common people. What principally attracted the 'attention of Messrs O'Messa and Pyne was his common people. What principally attracted the 'attention of Messrs O'Messa and Pyne was his common to him for decision day after day. He sits pledding at wak in durbar from 10 in the morning cili laket night. The durhar is open to all, and the bumbler approach bin with their couplaints. As he marched back recounty from Paghman to journed 3000 treebs many poor people along the route did for heistate to present their petitions to him pursually. He invaribly received thom und after glanding, at them scribbled sense verifs and mailed them in an officer near.

He seems to trust no one, but endeavors to do deer ything himself. Affairs the most in-significant from all parts of the country are rejected to hum direct. "Their or fort reports, and they are all nostly life if examine had compare them und extract the true vehicle inyself." There can be no doubt that he is far in advance of the year, and he will not week the captain make a hip is far a torque will not work, the captain make a hip is far a country we will be a far in advanced to be people, and will not work, the captain nother after the reportality on beard ship. Afghannatan he tent ship, the short in the sea, the Afghanna are the crow, I had be a few here of the way. "When a ship is far a country could be rely more thoroughly on his people. He is keen a live to the advantage and the countr

probably go far thyard Europeanizing the country could he rely more thoroughly on his people. He is keenly alive to the advantages likely to fell we from the material development. In his personal manuer is a quiet, but hearly and genial, he cares rothing for estenation and display, he has a logist to a great extent European style, and has display he has the model in the Korepan style, and hes displayed to he could be sitted to a great extent European style, and hes displayed to he had a logar. Now York Tribuco I

New Conception of the Chinese.

I had many agreeable conversations with Mea. Anson Burlingama in Permuda last winter and large vince formed an entirely new sucception of the Chinese changity sho says that the Acceptant people only see the refuse of the Chinese inclinal. Annual all the people is he has not and controlled the former of the Chinese inclinal.

new conception of the Chiese changer should be shown that the American people only sees the refuse of the Calasse nation? Among all the people she has met, and opticially Missistic Chinese materially and controlly managed to people she has met, and opticially Missistic Chinese materially and comboding to the observable and comboding to the observable and comboding to the observable in the extreme percentage of the observable in the ob

A STORY OF LINCOLN.

The good of the child as the leason halorms. Discipling of the right kind in a good nontal training as arithmetic. It is not of the right kind in as good montal training as arithmetic. It is not of the right kind unless it, requires intellectual of the right kind unless it, requires in the control of a woman in an any tim, who made to salk until she became dispersit, and told the stake until she became dispersit, and the orport radi: "You must stopicly you must control younged." If which the disance winen I was a gift. I never dontrolled myself when I was will, and not I cannot." The teacher has a wider responsibility, a weightfir disciplinary duty that she same, weight in the wine I was until only to be controlled, but they must be taught to central themselves absolutely, homenly, completely, Journal of Education.

Practical Co-pararating.

Practical Co-operation.

No one who knows anything about co-operation in principle and practice disputes the fact that it pays. A frest and interesting proof of this has just come to me. It young greecery there in a wholesale house found himself out of a job semb time ago. He lived in Hariem, fit a neight-rhood thanted chiefly by people of limited means like himself. Knowing the value of produce he had often remarked to his wife on the advance often remarked to his wife on the advance price charged up town by jurveyors of the necessition of life, and whom he found he had nothing che to occupy his time with he commoneed ito buy the family supplies down town and cerry them home in a basket. A neighbor in the home suggested that he should do the marketing for her, too, because the family in the family in a basket. A heighter in the home suggested that he should do the marketing for her, too, because the family in the family in grover shall interher. She pald kind the oppose a price for them, so that he hot only get his own supplies at bottom figures, but had the expense of bringing them up town prore than paid for

of bringing them up town more than paid for.

This suggested an i ha ta him. He made out a price fist, knowing an advance on least and still less than the local safe, secured the aupport of some more religitions and commenced to a rarket for them daily in a wagon that he bired by the month. In this way he get the own food supply for a sting. Then some of his customers propose 4 to form a regular association, pay him a safary for daing the bishness and rappy the benefit of the savings thempelved. He reactly agreed to this, and is now purveyor general to some twenty families, gold a higger safary than he received through his cherkship and hopes to hudd the section of into astrong co operative club, with its cown store and staff—M fred Trumble in New York Yow.

Georgo M. Pullmar was born in Brotton, Chautauqua county, and his hirth year 1831. He lived in Broction fourteen years and then moved to Albion, where he also resided four-teen years. At Albion he became acquainted sted in legislation concerning sleeping car

be was called upon by Senator Field with a request for several loans, and out of these ac-commodations an arrangement grow between vice on the state two research traces provided by the profession of the first and told then that he had and opportunity to buy back the privileges critical other reads, and that he would like to ad his half interest in the copartizership line to Mr. Pullman | A bargain was struck, and mr. A bargain on the Alton read and been taken off by the superintendent; who was a sympathizer with the south, and who thought that believe the war was over grass would grow in the streets of facingth. The buttook for the lation was very dublome. It is a singular flustration of Mr. Pullman's god ferting that he had lamply concluded the purchase of his partner's half interest before business began at ence to make returns. These oldering cars on the Alton read, with which Mr. Pullman's flust experiments were tried, were simply two ordinary pleasager chackes, which he had changed into the component kind of shepting cars at slight exposes. Polyty contains so charged for a bertin and the first night, hear beeths were sold. Albont this time the Pike's peak fever see in, shull be first right, there beeths were sold. Albont this time the Pike's peak fever see in, shull be for the property of the property of the partnership of the property of the property of the property of the peak fever see in, shull be first light, there beeths were sold. Albont this time the Pike's peak fever see in, shull be first light, then beeths were sold. Albont this time the Pike's peak fever see in, shull be first light, then beeths were sold been given project.

INCONNING OF THE PILACE CAIT.

In 1864 Mr. Yullman, who had been giving the sleeping car theshiese close anto attem, and who had become deeply interested in the thought that there was a wide field for juscattive general in that direction, met a master car builder of the Alton railroad, who was an old friend, and paid him \$100 a mouth to

built in this country.

Althoras Men Laron

Of coursepraintend men who heard of Me Pulman's plans similed, and said that if Mey Pulman's plans similed, and said that if Mey Pulman's plans similed, and said that if Mey Pulman's plans similed in proceedings of the said of the semipline and look all that he had, But his consynction was strong in all dear land with that plack and analonely which have always characterized his clear tightled business policy, he went alread not the oran was built. The mart question was the decoration of it. Mey Pulliman determined that it should be the hand-somet car just it respects that over had been made in the lecountry. He came of to New York and Diere hoppened to meet the artist who had just decorated the loss of Saintel

Jilliam He at oncoolesed with this artist teck hum we hand st him at very theoretical.

Whentie Pones was finished it had east the extraordinary sum of \$15,000, a large price even now for a sleeping four. It was a wonder to hearthough it was just as Mr. Pullman but expected. The hearth of the finish and the hearthough annovation he had made were alterfuled for and near by the newspapers and by railread ment and some of the latter began to believe that the Idead of the inventor after all were practicable. The Pones with a process of building for, a whole year. The assaudantion of limeoin occurring at this time, it was suggested that the Plenes to used in the funeral train, and it was non from Springfield to Chicago on the Alten read. As had been profiled when the reads as then constructed. It was no constructed when the car was built, it was no wight to run on the roads as then constructed. It was not expected by the condition of the platforms that profeed and to take numberous changes at stations so that the car, with its which of an additional fost, could pass.

BOSTON,

could pass | Thus the right code had to make way for the improvements that the convenience of the traveling mittle demanded. Everywhere the beauty of the Pioneer was talked at, and it was not strange that seen after when Geni Grant can'd home, the use of the car way asked to convey too great here from Detroit to Galeta. The Michigan Contril raffeood was compelled to do preceedy what the Alton road did-cast its platforms, and in other ways make way for the car—and from this time on the raffeod prepared themselves for the new palace car.—"J.
